

We need you!

Do you have Bipolar Disorder?

or

Are you healthy, with no personal or family history of mental illness?

If you are between 18 and 60 years of age you may be eligible to take part in important new brain research.

This study is investigating thinking skills and emotion in people with bipolar disorder. It will involve a brain scan, blood test and participation in a range of thinking skill tests. This will take place over two 4-hour sessions at the Advanced Technology Centre at Swinburne University, Hawthorn.

You will be reimbursed for your time and travel costs.
